

Patient Portal Overview

Available Services

- The online portal provides several important services for our patients:
 - prescription refill request form
 - specialist referral request form
 - important patient communication
 - personal information updates

Directions

- **Enroll** for an account in the office.
- **Visit** <http://www.nrpediatrics.com> and **click** Patient Portal link.
- **Log in** using the username and temporary password created during enrollment.
- **Change** the temporary password through the patient portal to a password which will be used for subsequent logins.

Important Information about Your Account

- Every patient in the family will have an individual patient account.
- Any email communication will not contain confidential health information, but will prompt you to sign into the patient portal in order to view received messages.
- If you change your personal e-mail, promptly update your contact information using the portal; otherwise, you will not receive message notifications.
- **ONLY** a personal email account must be used for communication.
- Your email address is confidential and will not be shared with other parties, except as required by law.
